

My Personal Recommendations

1. Tuners

Polytuners are **THE BEST**, totally worth spending a little extra!

2. Picks

Dunlop picks are excellent and I **LOVE** them!

I use JAZZ 3, but they are all great!

3. Acoustic Guitar Strings

Elixir strings can't be beat!!! They last forever and sound **AMAZING**. I only use these strings and I've tried many brands. Try to get 10-46 or 11-52

4. Electric Guitar Strings

Ernie Ball are used by top guitarists and I **LOVE THEM!!!**

Here is a video where I talk about strings :-)

https://www.youtube.com/watch?v=Rx6sY_PLH2s&t=2s

5. Acoustic

I love Yamaha guitars. The price is excellent for the quality they deliver :-)

6. Electric Guitar Bundles

I have had lots of great experience with Squire from FENDER guitars :-)

7. Acoustic Guitar

These are recommendations for higher quality acoustic guitars :-)

Yamaha in the \$500 + range are excellent!!! Try to get “00” “”000” or “OM” size, they are great!!! (The sales person will know what you’re talking about!) :-)

8. Electric Guitar

You can’t beat a Fender Stratocaster built in Mexico as far as price and quality you get for it.

9. Amplifier For Your Electric Guitars

I have had a line6 for years and it always works really well and has great tone.

Check out the SPIDER 30W ;-)
